

VISIBADGE
VISITOR MANAGEMENT SYSTEMS

Health and Safety legislation requires you to inform all visitors of your procedures as they enter your site. It's easy with our range of

VB Visitor Series

VisiBadge Lite software will provide you with the tools you need to be Health and Safety compliant. By entering details into VisiBadge Lite, you will instantly know who is on your premises and identify them with a professional, legible electronic pass. In addition, a comprehensive, searchable history of visitor traffic is created.

VisiBadge Lite is the ideal package for companies of any size who have small numbers of visitors. This version is a straightforward replacement for a paper-based system, with the benefit of immediate cost savings. It is also upgradeable to VisiBadge Pro, Pro Ex or XFR versions. If you only require the basic reporting facilities and do not need a pre-booking facility, then this is the ideal entry level solution. The software is very easy to use and will enable your reception staff to handle your visitors efficiently and professionally.

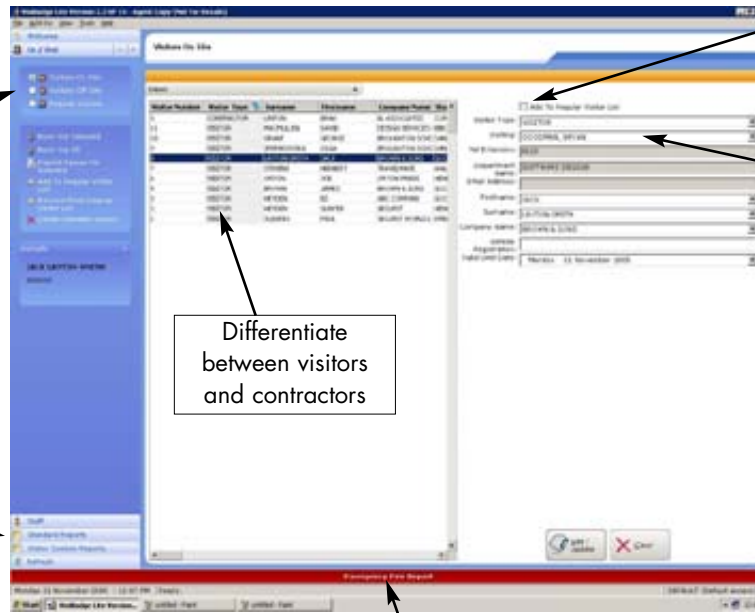

Badges now on PVC or paper with or without photos and bar code
