

Visibadge Pro Ex adds yet more power to the visitor management system with extra features such as: pass designer, permanent card holder management, photo support and signature verification. Ideal for multi tenanted buildings where many different layouts may be required. Pro Ex also has the flexibility to create extra data input fields and gives you the choice of printing onto paper or/and PVC.

With our easy-to-use pass designer module you can customise your passes according to your specific requirements. Create pass layouts in various sizes to suit a particular circumstance or occasion - for example, paper passes for visitors and plastic cards for VIP guests (to add prestige) and long term contractors for greater durability. Pass designer also allows you to implement a colour coding system for easy differentiation between different categories of visitor.

For higher security, VisiBadge Pro Ex enables you to capture photographs of all visitors - these are stored in the database and can be printed if required.

FEATURES

- Fast visitor entry
- Photo capture facility
- Field manager
- Health & Safety compliant
- Pre-booking of visitors (to save time)
- Pre-printing of visitor passes (to save time)
